

## ABOUT THE SEEKER

**Enel** is a multinational energy company and one of the world's leading integrated electricity and gas operators. Enel works in 35 countries across 5 continents, generating energy with a net installed capacity of almost 85 GW, selling gas and distributing electricity across a network spanning approximately 2.2 million km.

With 63.5 million end users around the world, Enel has the biggest customer base among its European competitors, and it is one of Europe's leading energy companies by installed capacity and reported EBITDA. The Group is made up of nearly 62,900 people who help promote Enel's two cardinal principles: innovation and sustainability.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its [openinnovability.enel.com](https://openinnovability.enel.com) crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.

Enel is also committed to helping to achieve four of the 17 UN Sustainable Development Goals (SDGs):

1. Access to affordable and clean energy
2. Support for quality education
3. Contributing to socio-economic development in the communities in which Enel operates
4. The fight against climate change

**Enel Global Infrastructure and Networks** is the business line in charge of steering and coordinating the energy transmission and distribution activities of Enel Group in 8 Countries (Europe and South America). Enel Distribución Peru, with more than 1.4M end users and 8TWh distributed energy, is the second Distribution System Operator in the Country, managing the distribution network of Lima.

With a view of sharing and fostering the best practice in network digitalisation and industry 4.0, from field operations to a new customer experience, Enel Global Infrastructure and Networks is today an international benchmark for Smart Meter and Smart Grid solutions.
