

ABOUT THE SEEKER

Enel is a multinational energy company and one of the world's leading integrated electricity and gas operators. Enel works in **33 countries across five continents**, generating energy with a managed capacity of **more than 89 GW**, selling gas and distributing electricity across a network spanning approximately **2.2 million km**.

With almost **73 million end users around the world**, Enel has the biggest customer base among our European competitors, and we are one of Europe's leading energy companies by installed capacity and reported EBITDA.

The Enel Group is made up of approximately **68,000 people from around the world** whose brilliant work is based on our values of **Responsibility, Innovation, Trust** and **Proactivity**. Together we are working on the same goal. We are Open Power and our aim is to overcome some of the greatest challenges facing the world. This is to be achieved through a new approach which combines attention to sustainability with the best in innovation.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its openinnovability.com crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.

Enel is also committed to helping to achieve six of the 17 UN Sustainable Development Goals (SDGs):

7 - Access to affordable and clean energy

4 - Support for quality education

8 - Contributing to socio-economic development in the communities in which Enel operates

9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

11- Make cities and human settlements inclusive, safe, resilient and sustainable

13 - The fight against climate change

Global Infrastructure and Networks is the business line in charge of steering and coordinating the energy transmission and distribution activities of Enel Group in 8 Countries (Europe and South America).

With a view of sharing and fostering the best practice in network digitalisation and industry 4.0, from field operations to a new customer experience, Global Infrastructure and Networks is today an international benchmark for Smart Meter and Smart Grid solutions.
