

ABOUT THE SEEKER

Enel is a multinational energy company and one of the world's leading integrated electricity and gas operators. Enel works in more than **30 countries across five continents**, generating energy with a total installed capacity of **more than 88 GW**, selling gas and distributing electricity across a network spanning approximately **2.2 million km**.

With almost **74 million end users around the world**, Enel has the biggest customer base among our European competitors, and we are one of Europe's leading energy companies by installed capacity.

The Enel Group is made up of approximately **68,000 people from around the world who are** working together on the same goal. We are Open Power and our aim is to overcome some of the greatest challenges facing the world. This is to be achieved through a new approach which combines attention to sustainability with the best in innovation.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its openinnovability.com crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.

Enel is also committed to helping to achieve 4 of the 17 UN Sustainable Development Goals (SDGs):

7 - Access to affordable and clean energy

9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

11- Make cities and human settlements inclusive, safe, resilient and sustainable

13 - The fight against climate change

Enel X is a global company with strong roots in the energy sector and an open strategy geared towards digitalisation, sustainability and innovation. Enel X uses a smart, simple and fast technologies to help our customers discover a new way of using energy, all over the world.

Enel X covers a global field of action

In order to provide the new solutions requested by customers and to be ready for the future, Enel X has structured its business line into four Global Product Lines:

- **e-Industries**, offering solutions aimed at large-scale customers, with a particular focus on flexible services (consulting, technologies linked to energy efficiency, distributed generation and the creation of off-grid and Demand Response solutions);
- **e-Mobility**, covering every type of customer, with the aim of becoming the technological leader in the sector and promoting increasingly widespread and efficient electrical mobility with charging infrastructures, Vehicle-to-Grid (V2G) and second-battery life services;
- **e-Home**, dedicated to residential customers, with services like installation and maintenance of advanced technological solutions for the home; for smarter homes, capable of saving more and more energy and offering greater wellbeing;
- **e-City**, offering public administrations and municipalities integrated services and connectivity solutions, like the wholesale offer of fibre optic services.

Alongside the four Global Product Lines, Enel X has also created the "**Innovation & Product Lab**," which conceives, develops and tests new products and services. This is often with the help of customers.
