

ABOUT THE SEEKER

Enel is a multinational energy company and one of the world's leading integrated electricity and gas operators. Enel works in more than **30 countries across five continents**, generating energy with a total installed capacity of **more than 88 GW**, selling gas and distributing electricity across a network spanning approximately **2.2 million km**.

With almost **74 million end users around the world**, Enel has the biggest customer base among our European competitors, and we are one of Europe's leading energy companies by installed capacity.

The Enel Group is made up of approximately **67,000 people from around the world who are** working together on the same goal. We are Open Power and our aim is to overcome some of the greatest challenges facing the world. This is to be achieved through a new approach which combines attention to sustainability with the best in innovation.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its openinnovability.com crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.

Enel is also committed to helping to achieve 4 of the 17 UN Sustainable Development Goals (SDGs):

7 - Access to affordable and clean energy

9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

11- Make cities and human settlements inclusive, safe, resilient and sustainable

13 - The fight against climate change

Global Power Generation (GPG), within the Enel Group, is the business line dedicated to **lead the energy transition** by developing the activities related to the generation of energy from renewable sources and deploying the evolution of the thermal generation portfolio. Regarding thermal generation, GPG's mission is to manage the thermal fleet operation and maintenance, maximizing operational efficiencies and exploiting worldwide synergies. The Group aims to achieve complete decarbonization by 2050, leading a process based on social and environmental sustainability.
