

ABOUT THE SEEKER

Enel is a multinational energy company and one of the world's leading integrated electricity and gas operators. Enel works in more than **30 countries across five continents**, generating energy with a total installed capacity of **more than 88 GW**, selling gas and distributing electricity across a network spanning approximately **2.2 million km**.

With almost **74 million end users around the world**, Enel has the biggest customer base among our European competitors, and we are one of Europe's leading energy companies by installed capacity.

The Enel Group is made up of approximately **67,000 people from around the world who are** working together on the same goal. We are Open Power and our aim is to overcome some of the greatest challenges facing the world. This is to be achieved through a new approach which combines attention to sustainability with the best in innovation.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its openinnovability.com crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.

Enel is also committed to helping to achieve 4 of the 17 UN Sustainable Development Goals (SDGs):

7 - Access to affordable and clean energy

9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

11- Make cities and human settlements inclusive, safe, resilient and sustainable

13 - The fight against climate change

Global Infrastructure and Networks is the business line in charge of steering and coordinating the electricity transmission and distribution activities of Enel Group in 8 Countries (Europe and South America).

With a view of sharing and fostering the best practice in network digitalisation and industry 4.0, from field operations to a new customer experience, Global Infrastructure and Networks is today an international benchmark for Smart Meter and Smart Grid solutions.

Enel is the largest private group to own and operate power distribution networks in the world, providing grid connection to over 74 million end users and distributing every year more than 480 TWh of electricity across more than 2.2 million kilometers of power lines spread throughout eight countries. With the ambition to unify the management of all our networks around the world, we are developing a new global operating model for our grids, pursuing an innovative platform organization. At the same time, we are redesigning a large portion of our operations leveraging on digitalization and strengthening our computational capabilities in order to process increasingly larger volumes of data. All of these elements are key for our growth strategy, which spans over 2021-2023 with a vision to 2030.
