ABOUT THE SEEKER

As a truly global business, **Enel** is perfectly placed to provide power around the world. Enel global reach extends from Europe to Latin America, North America, Africa, Asia, and Oceania. Enel connects hundreds of millions of people to more reliable and increasingly sustainable power, supplying the largest customer base of any European energy company.

Enel works in **31 countries around the world**, generating energy with a total installed capacity of **more than 88 GW (49 GW** of capacity from renewable sources**)**, selling gas and distributing electricity across a network spanning approximately **2.2 million km**.
With almost **74 million end users around the world**, Enel has the biggest customer base among our European competitors, and we are one of Europe's leading energy companies by installed capacity.

The Enel Group is made up of approximately **67,000 people from around the world who are** working together on the same goal. We are Open Power and our aim is to overcome some of the greatest challenges facing the world. This is to be achieved through a new approach which combines attention to sustainability with the best in innovation.

Enel is dedicated to creating innovative solutions that meet society's changing needs. Through its openinnovability.com crowdsourcing platform, the company connects people and ideas from across the world, encouraging anyone to propose sustainable innovation projects and solutions that help develop local communities.
Enel is also committed to helping to achieve 4 of the 17 UN Sustainable Development Goals (SDGs):
7 - Access to affordable and clean energy
9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
11- Make cities and human settlements inclusive, safe, resilient and sustainable
13 - The fight against climate change

Enel X is the global business line of Enel Group, combining its own progressive, future-oriented approach with the financial solidity and worldwide reach of the Group. Enel X is leading the energy transformation all over the world, turning complex technologies into simple, approachable, effective solutions that enable everyone to transform energy into new opportunities for sustainable growth and progress.

Enel X scalable ecosystem of products and services is designed to meet the needs of people, businesses and cities, through an approach that is open and receptive to their changing needs. Through integrated set of cutting-edge solutions based on circular economy business models, Enel X enables technological transformation for smarter, more efficient living. With its open innovation ecosystem, Enel X acts as an accelerator of electrification and decarbonization in the energy transition. This reflects our approach to sustainability, which is both at the core of our business and closely linked to the values of the Enel Group.

Enel X innovative and sustainable solutions range from electric mobility, smart home technologies and business-ready products and services to digitalized urban infrastructures for smart cities, financial services and fiber optics that guarantee efficient and speedy communication to everyone, everywhere. Enel X presence extends from Europe to Latin America, North America, Asia and Oceania, over a total of 20 countries. Furthermore, Enel X operates in other 8 countries in which we have a commercial development.

From electric mobility to smart cities, and from smart homes to energy storage and flexibility services: through an ecosystem of integrated solutions, Enel X promotes new uses of energy, enabling cities, businesses and people to live, work and grow in a sustainable way.
